

Connect Cause Enterprise Security Awareness Training

At Connect Cause, we believe that a truly secure nonprofit organization starts with educated users. Our Enterprise Security Awareness Training is a comprehensive, turnkey solution designed to reduce human cyber risk through interactive education and real-world testing. Delivered monthly and built for nonprofit environments, our training equips your staff to recognize, avoid, and report cyber threats.

Connect Cause delivers ongoing security awareness training designed to educate and empower nonprofit staff to recognize and respond to modern cyber threats. Built on a powerful Security Awareness Training platform, our Connect Cause Enterprise Security Awareness Training combines expert content with real-world attack simulations to dramatically reduce human risk across your organization.

Did You Know?

Over 90% of cyber breaches are caused by human error. That's why training your staff isn't optional—it's essential.

Key Features

- Monthly bite-sized training videos (under 5 minutes) designed for engagement and retention.
- Real-world phishing simulations sent to users to test and reinforce awareness.
- Gamified learning paths and instant feedback to encourage participation.
- Executive-level dashboards to monitor progress, completion rates, and risk trends.
- Automated content delivery and user management for easy administration.
- Fresh content released monthly to keep pace with the latest cyber threats.

How It Works:

- **Engaging, Bite-Sized Training Videos** – Staff receive monthly video-based micro-trainings (under 5 minutes) on topics like phishing, social engineering, password security, and more—designed to hold attention and drive retention.
- **Real-World Phishing Simulations** – Periodic phishing tests are delivered to employees to measure awareness, catch risky behavior early, and provide instant feedback.
- **Tracking & Analytics** – Admins receive access to a centralized dashboard with visibility into training completion, simulation performance, and risk trends by department or user.
- **Updated Monthly Content** – Training evolves with the threat landscape, ensuring your staff stays prepared for the latest scams and attacks.

Why It Matters for Nonprofits:

Nonprofit organizations are increasingly targeted by cybercriminals, and over 90% of successful breaches start with a human mistake. Our Security Awareness Training turns your staff into cyber defenders, reducing the risk of phishing, ransomware, and social engineering attacks. It also supports compliance and may help meet cyber insurance requirements.

- **Minimizes Human Error** – Over 90% of successful cyberattacks stem from user actions. This training turns your people from your weakest link into your first line of defense.
- **Supports Compliance & Cyber Insurance** – Regular security awareness training supports best practices and may help satisfy compliance or cyber insurance policy requirements.
- **Fosters a Security-First Culture** – Creates awareness and accountability across all levels of your organization—without needing IT to manually manage the process.

With Connect Cause Enterprise Security Awareness Training, your organization gets a turnkey solution to proactively defend against phishing, ransomware, and social engineering attacks—one educated user at a time. Your organization can stay protected, educate your team, and build a long-term culture of security awareness—without additional burden on your IT team.
